Annual R.O.P. Summary 1947-48

Reg. U. S. Pat. Off.

Reg. U. S. Pat. Off.

UNITED STATES DEPARTMENT OF AGRICULTURE
AGRICULTURAL RESEARCH ADMINISTRATION
U.S. BUREAU OF ANIMAL INDUSTRY

Foreword

This summary of U.S.R.O.P. work in 43 States is published in accordance with the July, 1947 revision of the National Poultry Improvement Plan which provides that:

" The R.O.P. Supervisor shall furnish the Bureau of Animal Industry, for publication, a summary of the U.S.R.O.P. work under his supervision each year, which shall include the following information for each flock:

- (a) Total number of pullets of that particular breed on the farm;
- (b) Number of pullets originally trapnested for the U.S.R.O.P. entry;
- (c) Number of pullets entered in U.S.R.O.P.;
- (d) Number of pullets entered in U.S.R.O.P. which are individually pedigreed;
- (e) Number meeting the U.S.R.O.P. requirements;
- (f) Percentage of birds entered meeting the U.S.R.O.P. requirements;
- (g) Number of birds qualifying which lay from 200 to 249 eggs;
- (h) Number of birds qualifying which lay 250 to 299 eggs;
- (i) Number of birds qualifying which lay 300 or more eggs;
- (j) Average egg production of the qualifying birds;
- (k) Average egg weight of the qualifying birds;
- (l) Average body weight of the qualifying birds;
- (m) Average egg production of all birds entered."

In addition to the above specified items the summary which follows shows for each flock:

- (n) Number of U.S.R.O.P. females in 1948 U.S.R.O.P. matings;
- (o) Pullorum class. (The pullorum classification shown is that reported by the official State agency for the 1949 season. The classification of the U.S.R.O.P. breeder's hatchery may be lower than that for his own flock; hence, the pullorum classification of the hatchery should be ascertained before U.S.R.O.P. chicks are purchased to be used in a participating flock.)
- (p) Number of years in R.O.P.

Explanation of Symbols and Abbreviations

Pullorum Class Key:

PT	-	U. S. Pullorum-Tested
PCd	-	U. S. Pullorum-Controlled
PP	-	U. S. Pullorum-Passed
PC	-	U. S. Pullorum-Clean

* Those breeders preceded by an asterisk are not participating in U.S.R.O.P. work with that breed and variety in the 1948-49 trapnest record year.

1/ Average egg weight and body weight for these flocks calculated on basis of total birds entered rather than on qualifying birds.

2/ Body weight for these flocks taken at time of first egg.

3/ Trapnesting discontinued on this flock before birds completed their year's production.
